STEPS TO STAY SAFE FROM ENALL TRAS

Follow these simple steps to ensure the safety of your inbox:

- Secure your email account with a robust, unique password, as you would secure your front door. Make sure not to share it with anyone.
- Employ two-factor authentication (2FA) to add an additional layer of security. 2FA acts as a digital bodyguard by verifying your identity before granting access.
- Be cautious of suspicious email links and unfamiliar attachments. These could harbor digital trojans ready to take down your network.

- Keep your email software and antivirus defenses updated to thwart security breaches.
- Avoid using public Wi-Fi for sensitive emails since data shared on open networks lacks the privacy you need.
- Stay vigilant against sophisticated phishing attempts capable of threatening your sensitive data.
- Regularly monitor your email for anomalies, ensuring prompt detection of any unusual activity.
- Safeguard crucial emails with secure backups, similar to how you safeguard your valuable items.
- Deploy spam filters to intercept sneaky attackers before they infiltrate your inbox.
- Use encrypted connections like HTTPS to shield data during transmission.
- Stay informed of emerging email threats to sustain a state of perpetual readiness.
